PROFILE SUMMARY

With a solid foundation built over 2 years of active engagement, I specialize in JS frameworks for fullstack development. During my previous experience, I proficiently developed and managed front-end development solely using Flutter for Android applications, with experience in implementing voice integration modules, geo-fencing, and NFC modules for personalized automation. I have a proven track record of driving innovation and delivering impactful solutions in software development projects.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Java, Dart, Kotlin, C#, C++, Python, PHP, HTML5, CSS

Frameworks: .NET Core, NextJs, ReactJs, React Native, NodeJs, Flutter, Bootstrap, Tailwind

Databases: PostgreSQL, MongoDB, MySQL, Hive

Tools/Technologies: Docker, Git, Jira, REST API, GraphQL, Jest, express, Redux, CI/CD, Linux

PROFESSIONAL EXPERIENCE

SmartNode Pvt. Ltd

Junior Software Developer

Vadodara, Gujarat

Jan 2022–Dec 2022

- Utilized the Flutter framework to independently oversee front-end development for Android and iOS applications, integrating agile development methodologies.
- Engaged in testing REST API functionality and database management, supporting a user community exceeding 2000 individuals.
- Integrated 8 new home automation IOT devices into the application. Developed a voice integration module with 400+ commands for home appliance control.
- Implemented Geo-fencing and NFC modules for personalized automation increasing user engagement by 24%.

Sleep disorder research internship

Research intern

Vadodara, Gujarat

Aug 2021–Dec 2021

- Analyzed sleep disorder data from 100 patients using Apriori K-means
- Identified a strong 90% correlation between sleep apnea-hypopnea syndrome and hypertension.
- Constructed a Random Forest model for 93.5% accurate sleep disorder diagnosis and 96.7% accurate prediction of related medical conditions.
- Derived correlation between patient's BMI and various sleep disorders.

PROJECT

SwiftRentals website

Next.js — Redux — Tailwind — Node.js — express — MongoDB — AWS

- A fully hosted car rental portal allows car owners to post their vehicle to put up for rental and users to filter and rent posted cars.

- The application uses Docker and jest unit testing to make the application robust and aws EC2 allows Scalability as per need.

Nasa Launch Portal

Node.js—GraphQL—React.js— Express—MongoDB

- Implemented concepts of Docker for CI/CD and utilized the helmet middleware for security.
- User can create missions by filling in details and selecting the rocket module fetched from the backend Nasa API, update past missions status, and list all missions created among different users.

DriveTest Portal

Node.js— ES6 — Express— MongoDB

- Built a drive test management interface, allowing users to create 3 types of accounts.
- Test takers can book from available appointment slots, Examiners can see booked tests and review tests, and admin can create appointment slots and see submitted results.

Bookstore E-commerce

Android Studio— Firebase— Kotlin

- Utilized unit testing for Quality assurance and improved overall product experience.
- User interface can view a catalog of books, add to a cart, and purchase in a 3-step checkout form with validators. Admin interface can perform CRUD operations on the book database.

EDUCATION

Conestoga College,

Post Graduate Web Development, GPA: 3.88/4.00

Kitchener, Ontario

Jan 2023–Present

ITM(SLS) Baroda University,

Bachelor of Engineering in Computer Science, CGPA: 7.78/10

Vadodara, Gujarat

Jun 2018–May 2022
